PAPERGAMES

# How to get PaperGames on your e-reader

Free board, card and puzzle games. No account, no ads, works offline.

Scan with your phone

---

1. Turn on WiFi on your e-reader.
2. Open the browser. Depending on the device it is called "Browser", "Web browser" or "Chrome", usually in the menu or under "Apps" or "More".
3. Tap the address bar at the top and enter this address:
   **yourchaoschris.github.io/PaperGames**
4. Set a bookmark so you can find the page again. If the browser offers "Add to home screen", that works too.
5. Wait until the home page says "Ready offline". This can take a minute or two. After that PaperGames also works without WiFi.
6. Choose a game. Every game has its rules, and at the bottom you find "Report an idea or bug".

**Tested on:** tolino, Kobo, PocketBook, Boox and other readers with a browser, also on phones, tablets and computers. On a Kindle it depends on the browser. Devices without a browser (for example reMarkable) cannot open the page.

**The page shows an old version?** The guide on the site has a "Force update now" button.
