PAPERGAMES

Sudoku

Logical reasoning

Open the game

Name: _____

Goal: You learn to reason step by step from safe clues, without guessing.

Rules: Every row, every column and every box contains each number exactly once. The small sudoku uses the numbers 1 to 4 and boxes of 2 × 2 squares.

1. Solve the small sudoku.

1	2		4
	4	1	
	1	4	
4			1

2. Solve another small sudoku.

2	1		
4			1
1			4
		1	

3. A row of a big sudoku (numbers 1 to 9) reads: 5 3 _ 6 7 8 9 1 2. Which number is missing?

_____

4. Explain to a classmate in two sentences how you found the first number in task 1.

_____

PAPERGAMES

Solutions for teachers

Sudoku

1.

1	2	3	4
3	4	1	2
2	1	4	3
4	3	2	1

2.

2	1	4	3
4	3	2	1
1	2	3	4
3	4	1	2

3. The 4 is missing.
4. Open answer. A good one is for example: only two numbers are missing in this row, and one of them is already in that column.
